Sw B1
A1

1. (Amended) A computer implemented method for selecting a rendering intent, the method comprising:

- receiving a source color image having colors within a source color gamut;
- receiving a plurality of rendering intents, wherein each rendering intent defines a mapping of colors from the source color gamut to a destination color gamut;
- generating a plurality of rendered images by rendering the source image using the received plurality of rendering intents;
- receiving input selecting a contrast mode;
- contrasting the rendered images by simultaneously previewing the rendered images according to the selected contrast mode; and
- selecting a rendering intent by receiving from a user a selected contrasted rendered image from the simultaneously previewed images.
